

Speaker Biography

Dr. Jonas Oldgren

Uppsala Clinical Research Center
UCR/MTC, Science Park
Dag Hammarskölds väg 14B
S-751 85 Uppsala
Sweden

Dr. Oldgren completed his studies in Medicine at the Uppsala University, Sweden in 1989. He then proceeded to take up a post as intern at the Nyköping County Hospital, before moving into the role of resident doctor in Internal Medicine in 1991.

In 1994 he moved to Uppsala University hospital where he took on a role in the department of Cardiology, moving from a resident doctor to senior consultant and Head of the Coronary Care Unit, as well working in clinical research. Since 2008 his roles have included senior teacher in the department of Medical Sciences and Senior Consultant / Head of Coronary Care Unit in the department of Cardiology.

Dr. Oldgren's special interests include thrombin inhibition in acute coronary syndromes and atrial fibrillation. He has also been investigator or co-investigator in several large-scale clinical trials, e.g. TRIM, FRISC II, ESTEEM, OASIS-5, OASIS-6, ExTRACT, APPRAISE, PLATO.

Most recently, Dr. Oldgren was the Swedish national coordinator of the phase III landmark RE-LY study, co-chairman in the global RE-LY AF registry and International co-ordinating investigator in the multi-national phase II RE-DEEM trial.
