

ANIMAL HEALTH

Boehringer Ingelheim welcomes collaborations with partners, who share our passion for improving the health and wellbeing of animals, to help us find solutions to some of the biggest challenges in animal health today.

- Global leader in animal health with an innovation-led portfolio
- Track record of developing game-changing vaccines, therapeutics and parasiticides
- Recent breakthroughs include the world's first stem cell-based veterinary treatment
- Industry-leading investment of more than €400 million in both external innovation and our own R&D
- Actively increasing our network of academic, biotechnology, pharmaceutical, agrochemical and digital partners

Our specific areas of interest offer various opportunities for collaboration across all stages of the value chain from research through development to commercialization:

CardioMetabolic Diseases | CNS Diseases | Immunology & Inflammation | Oncology | Infectious Diseases | Parasitology | Oral Health | Technologies

By working together we can learn more, do more and achieve more to accelerate the delivery of the next breakthroughs in animal health.
